## **DETAILED ACTION**

This application has been examined. The claims 1-80 are allowed.

## Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a pointing device for detecting a slid distance and a slid direction of an operation key located approximately at the center of an opening section to generate a control signal according to the detected slid distance and the slid direction, wherein: when an original point is defined as a point where a slid distance of the operation key is zero, and a maximum value and a minimum value are defined as max-max and min-max, respectively, in the state where the operation key is moved until reading the rim of the opening section, the pointing generates the control signal corresponding to the slid distance of the operation key by: determining a strength of the control signal in the case where the operation key is located within a circular area of the case. The combination of the closest prior art of Kobachi et al. (US 6,326,948), Yu (US 2003/0142071) and Anto et al. (US 2003/0063068) show a similar invention, however, they fail to teach the operation key is located a the original point and whose radius is n/N of the max-max (n and N are arbitrary positive integers, and n<N); determining a strength of the control signal corresponding to the slid distance of the operation key on the basis of a predetermined rule of operation in the case where the operation key is located within a toric area whose distance from the original point is larger than n/N of the max-max and smaller than the min-max; or determining a strength of the control signal corresponding to a strength obtained when a slid

Art Unit: 2629

<u>within an area whose distance from the original point is larger than the min-max</u> as claims 1, 5, 41 and 45.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimnhung Nguyen whose telephone number is (571) 272-7698. The examiner can normally be reached on MON-FRI, FROM 8:30 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe can be reached on (571) 272-7691. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
